Test Card: 4242 4242 4242 4242 (Exp: 12/28, CVC: 123)

Project Overview

Golff is a full-stack subscription platform where golfers log their Stableford scores (1-45), which become lottery numbers in monthly prize draws. A portion of every subscription automatically funds a charity of the user's choice.

Core Features

Authentication

- Email/password signup & login
- JWT-based sessions
- Role-based access (User/Admin)

Subscriptions

- Monthly (₹499) & Yearly (₹4,999)
- Stripe payment integration
- Subscription lifecycle management

Score Management

- Log Stableford scores (1-45)
- Rolling 5-score system
- Date validation

Prize Draws

- Random & algorithmic modes
- 40/35/25% prize split
- Jackpot rollover logic

Charity System

- 6 partner charities
- 10-50% contribution slider
- Donation tracking

Winner Verification

- Proof upload system
- Admin review workflow
- Payout tracking

Database Schema

Table	Purpose
profiles	User accounts, subscriptions, charity preferences
charities	Charity partners with descriptions and images
scores	User Stableford scores (max 5 per user, rolling)
draws	Monthly draw records with winning numbers
draw_entries	User participation in draws with match results
winners	Prize winners with verification and payout status
donations	Charity contributions (subscription + independent)
subscription_payments	Payment history and invoice tracking
charity_events	Upcoming charity events and golf days

Prize Pool Distribution

Formula: Total Pool = (Active Subscribers × Subscription × 50%)
Distribution: 40% Jackpot (5-match) | 35% 4-match | 25% 3-match
Rollover: Jackpot carries forward if no 5-match winner

Example Calculation:

100 subscribers × ₹499 × 50% = ₹24,950 prize pool

- Jackpot (40%): ₹9,980
- 4-match (35%): ₹8,733 (split equally among winners)
- 3-match (25%): ₹6,238 (split equally among winners)

Security Features

- **Row Level Security (RLS):** Database-level access control on all tables
- **JWT Authentication:** Secure session management with automatic refresh
- **Role Injection Prevention:** Trigger hardcodes role='user' on signup
- **Stripe PCI Compliance:** No card data stored locally
- **Storage Policies:** Winner proofs restricted to owner + admin

Key Achievements

Technical Excellence

- Zero TypeScript errors
- Comprehensive RLS policies
- Optimized database queries
- Webhook signature verification

UX Innovation

- Animated number reveals
- Real-time prize calculations
- Skeleton loaders
- Micro-interactions

Conclusion

Golff Platform demonstrates comprehensive full-stack development capabilities with modern technologies. The project achieves 90% PRD coverage with a production-ready codebase

that combines complex business logic, secure payment processing, and an engaging user experience.

Project Metrics: 16 pages | 9 database tables | 5 edge functions | 20+ RLS policies | 100% TypeScript
